

Legacy™ Pool/Spa Heaters Flue Transition Plate Important Installation Information

⚠ WARNING

FOR YOUR SAFETY - This product must be installed and serviced by personnel qualified in pool/spa heater installation. Improper installation and/or operation can create carbon monoxide gas and flue gases which can cause serious injury, property damage, or death. For indoor installations, as an additional measure of safety, Zodiac Pool Systems, Inc. strongly recommends installation of suitable Carbon Monoxide detectors in the vicinity of this appliance and in any adjacent occupied spaces. Improper installation and/or operation will void the warranty.

⚠ WARNING

Flue gases can be very hot and can contain carbon monoxide which can cause property damage, severe injury or death. Make sure the unit is off and cool to the touch before attempting this procedure.

⚠ WARNING

To prevent improper operation which can create carbon monoxide gas and flue gases that can cause serious injury, property damage, or death, install this flue transition plate only on model size 125 heaters in areas of 0 to 3,000 feet of altitude.

NOTE When installing a new pool heater that will connect to existing venting, some adaptation of the vent system will be required. This is due to variations in venting centerlines with the replacement heaters. In the USA, refer to the National Fuel Gas Code (ANSI Z223.1/NFPA 54) and all local codes. In Canada, refer to the Natural Gas and Propane Installation Code (CSA B149.1) and all local codes.

This flue transition plate is ONLY for model 125 heaters which are installed at altitudes not exceeding 3,000 feet above sea-level (i.e., 0-3000 feet).
